PROFILE SUMMARY

Final-year Computer Science student at Kanpur Institute of Technology (AKTU) focused on full-stack development and AI integration. Experienced in building web applications using React, Next.js, Node.js, and Python. I enjoy working on complex backend architectures, developing agentic AI systems, and solving algorithmic challenges in C++.

TECHNICAL SKILLS

Languages: C++, Python, TypeScript, SQL
Frontend: React 19, Next.js 15, Tailwind CSS, HTML/CSS
Backend & DB: Node.js, Express.js 5, Flask, Prisma, PostgreSQL
AI / ML: Gemini API, LLM integration, Prompt
Tools & Platforms: Git, GitHub, Google OAuth, VS Code

PROJECTS

Fitness Progression Tracker — Full-Stack AI Web App

Stack: Next.js 15, React 19, TypeScript, Express.js, Prisma, PostgreSQL, Gemini API, Google OAuth

- Built a gamified strength-training web app with a skill-tree UI (ReactFlow DAG), personal record logging, and Epley 1RM calculation for exercise progression tracking.
- Integrated Gemini AI coaching for personalised workout recommendations; implemented Google OAuth for secure authentication.
- Designed full backend with REST APIs in Express.js 5, Prisma ORM, and PostgreSQL — deployed end-to-end independently.

DSA Tracker — Full-Stack Learning Platform

Stack: Next.js 16, React 19, Tailwind CSS 4, Express 5, Prisma 5, PostgreSQL, TypeScript, NextAuth, Monaco Editor, ReactFlow, Recharts

- Built a full-stack DSA learning platform with a structured roadmap tracker, Monaco-based problem workspace with saved solutions, theory-first Learn section (tracks → modules → lessons), and spaced-repetition review flow.
- Integrated AI-assisted endpoints (hint, review, trace-style guidance) and a browser extension for real-time LeetCode sync — including direct submission with verdict, runtime, and memory results.
- Designed a monorepo architecture with Next.js frontend, Express 5 backend, Prisma ORM on PostgreSQL, and Docker Compose for local DB; includes a 20-module DSA Bootcamp curriculum seeded via admin API.

Autonomous Job-Hunting Agent

Stack: Qwen (via Ollama), Playwright, Selenium, Python

- Engineered a browser-automation agent for autonomous job applications across Internshala, LinkedIn, Unstop, and Naukri with LLM-driven form filling and application tracking.
- Implemented CAPTCHA handling, session management, and multi-platform support with a structured schema for tracking application state.

EDUCATION

B.Tech — Computer Science 2023 – 2027 (Pursuing)
Kanpur Institute of Technology, Kanpur | AKTU, Lucknow **CGPA: 7.2%**

Intermediate (Class X) 2021
Modern International School, New Delhi | CBSE 60%

High School (Class X11) 2023
Modern International School, New Delhi | CBSE 65%

DSA & COMPETITIVE PROGRAMMING

- Consistently practise Data Structures & Algorithms in C++ — problems covered include binary trees, Kadane's algorithm, trapping rainwater, 3Sum, Dutch National Flag, and sliding window patterns.
- Completed a 45-day industrial DSA training programme by RCPL, focusing on problem-solving patterns used in technical interviews.

CERTIFICATIONS & WORKSHOPS

- Completed 7 courses on Infosys Springboard covering core CS and development fundamentals.
- Participated in a hackathon organised by Chandigarh University, gaining experience in rapid prototyping under time constraints.
